RESEARCH SUMMARY

Fields of interest: statistics, signal processing, machine learning, wireless communications, graph theory, random matrix theory.

Abstract: My research work consists in the theoretical analysis and the development of new algorithms in large dimensional systems, with applications to statistics, signal processing, wireless communications, statistical finance, and recently to machine learning and graph theory. My interest is mostly in the field of random matrix theory which appropriately models many such systems (multi-user MIMO systems in wireless communications, large antenna arrays in array processing, graph adjacency matrices and kernel matrices). The main findings of my work consist (chronologically) in the following: (i) in wireless communications: derivation of the capacity of MIMO-MAC systems and linearly-precoded broadcast channels with many antennas, (ii) in signal processing: derivation of improved detection and estimation methods for array processing in impulsive noise, (iii) in statistics: the analysis of the random matrix asymptotic of robust scatter estimators along with multiple applications to robust detection and estimation, and (iv) in machine learning: an original analysis framework of kernel spectral clustering algorithms for large dimensional datasets as well as a new approach to study non-linear random matrix models common to neural network modelling.

These works led to more than thirty publications in international math and engineering journals (most of them in Journal of Multivariate Analysis, IEEE Trans. on Information Theory, and IEEE Trans. on Signal Processing), more than fifty articles published in international conferences, and a 650-page book published by Cambridge University Press. In 2011, I received the best 2010 PhD thesis award delivered by EEA/GdR ISIS/GRETSI. In 2012, M. Debbah (PI) and myself received an ERC Starting Grant (project MORE), and I myself received in 2014 an ANR Young Researcher Grant (ANR4GRAPH project). In 2013, I was awarded the CNRS Bronze Medal in section “science of information and its interactions” and the IEEE ComSoc Outstanding Young Researcher prize for the Europe/Middle-East/Africa region.

EDUCATION

Université d’Orsay, Saclay, France.

January 2011 - February 2015

HDR diploma in Physics

- Title: Robust estimation methods in the large random matrix regime

- Jury: A. Hero, L. Pastur, J-Y. Tournet (evaluators), F. Benaych-Georges, P. Bondon, M. McKay, E. Ollila.

CentraleSupélec, Gif sur Yvette, France. **January 2008 - November 2010**

Ph.D. in Physics (**Telecommunications**), November 2010

- Title: Application of random matrix theory to future wireless flexible networks
- Advisor: **Professor Mérouane Debbah**
- Jury: P. Loubaton, X. Mestre (evaluators), M. Debbah, P. Duhamel, W. Hachem, A. Moustakas, J. Silverstein.

Telecom ParisTech, Paris, France. **September 2004 - June 2007**

M.S., **System of Communications (SiCom)**, (mention TB), March 2008

- Wireless communications
- Image processing
- Blind detection techniques

Eurecom Institute, Sophia Antipolis, France. **September 2005 - June 2007**

M.S., **Telecommunication Engineering**, September 2007

- Mobile communications
- Embedded systems
- Computer science

Lycée Louis le Grand, Paris, France. **September 2001 - June 2004**

Preparation to Engineering School

PROFESSIONAL EXPERIENCE

Université Grenoble-Alpes, Saint-Martin d'Hères, France.

GSTATS IDEX DataScience Chair Holder

April 2018 - Present

- Research in applied random matrix theory for large dimensional statistics and machine learning.
- Teaching in data science masters.

CentraleSupélec, Gif sur Yvette, France.

Full Professor

January 2011 - Present

- Research in mathematics applied to statistics, machine learning, and signal processing.
- Teaching in undergrad, master 2 (SAR and MVA) and PhD levels.

ST-Ericsson, Sophia Antipolis, France.

Development Engineer and PhD student

September 2007 - December 2010

- Research in cognitive radios, random matrix theory, probability, applied to future multiple antenna-based standards.
- Specific applications to mobile terminal synchronization, performance evaluation for the 3GPP-Long Term Evolution and 3GPP-LTE Advanced standards.

Intern (DSP Firmware Development)

March 2007 - August 2007

- Development of an analytical solution for real-time hierarchical audio task scheduling.
- Design of a real-time error concealment algorithm on DSP platform.

Eurecom Institute, Sophia Antipolis, France.

Research Trainee, adv. R. Knopp

July 2006 - August 2006

- Software simulation of Radix-2,4 FFT implementations.
- DSP portage of FFT solution.

**TEACHING
EXPERIENCE**

ENS Cachan, Cachan, France.

Random matrix theory and machine learning applications

Since 2013

- Master 2 level, lectures, 15 hours

CentraleSupélec, Gif sur Yvette, France.

Introduction to random matrix theory

Since 2012

- Master 2 level, seminar lecture, 12 hours

Theoretical foundations of flexible radio networks

Since 2012

- Master 2 level, seminar lecture, 12 hours

Techniques of scientific writing

Since 2012

- Undergraduate and PhD levels, lectures, 18+12 hours

Practical lectures in signals, filtering, and statistics

Since 2012

- Undergraduate and PhD levels, lectures, 18+12 hours

Introduction to random matrix theory

Fall 2009/2011

- PhD level, lectures, 18 hours

Polytech Nice-Sophia, Sophia-Antipolis, France.

Digital communications

Spring 2010

- Master level, lectures, 24 hours

Digital filtering

Spring 2010

- Master level, practical lessons, 60 hours

COMMUNITY

IEEE

IEEE Senior Member (member since 2007)

since 2015

IEEE TSP Associate Editor

since 2015

IEEE STPM Technical Committee Member

since 2015

Technical Area Chair of IEEE Asilomar'16

2016

Organizer of 3 special sessions in IEEE Asilomar'13, SSP'14, and SSP'16

GRETSI

Member of the GRETSI association

since 2011

Editor for special issue "Matrices aléatoires" of TS magazine

2015

GDR ISIS

Co-organizer of GdR day “Estimation et traitement statistique en grande dimensions” **2013**

AWARDS

CNRS Bronze Medal.

2013 CNRS Bronze Medal in section “science of information and its interaction”

- Awarding my work in Signal Processing and Wireless Communications as a young researcher since 2008.
- Year: 2013.

IEEE ComSoc Young Researcher Award.

2013 IEEE ComSoc Outstanding Young Researcher Award for the EMEA Region

- Awarding my work in Communications-related topics as a young researcher since 2008.
- Year: 2013.

Best PhD Thesis Award.

EEA/GdR ISIS/GRETSI 2011 Award of the Best 2010 Thesis

- “Application of random matrix theory to future wireless flexible networks”
- Year: 2011.

Best Student Paper Award.

Second prize of the 2012-2013 IEEE Australia Council Student Paper Contest

- “Large System Analysis of Linear Precoding in MISO Broadcast Channels with Confidential Messages”
- Recipients: G. Geraci, R. Couillet, J. Yuan, M. Debbah, I. B. Collings.
- Year: 2013.

Best Student Paper Award.

Best Student Paper Award Final of the 2011 Asilomar Conference

- “Asymptotic Analysis of Double-Scattering Channels”
- Recipients: J. Hoydis, R. Couillet, M. Debbah.
- Year: 2011.

Best Student Paper Award.

Best Student Paper Award of the 2008 ValueTools Conference

- “The Space Frontier: Physical Limits of Multiple Antenna Information Transfer”
- Recipients: R. Couillet, S. Wagner, M. Debbah, A. Silva.
- Year: 2008.

PUBLICATION RECORD

Google scholar figures as of Feb. 2017

Overall 1 book, 3 chapters, 40+ journals, 60+ conferences, 4 patents.

BOOKS AND BOOK CHAPTERS

- **Random Matrix Methods for Wireless Communications** [book]

Theoretical random matrix tools (finite dimensional analysis, limiting spectral laws, free probability, deterministic equivalents, statistical inference) and applications to wireless communications (SU-MIMO, MU-MIMO, CDMA, detection, estimation, channel modelling).

 - *Authors:* R. Couillet and M. Debbah
 - *Publisher:* Cambridge University Press
 - *Year:* 2011
- **Mathematical Foundations for Signal Processing, Communications and Networking** [book chapter]

Chapter “Random matrix theory” on random matrix theory and especially statistical inference methods.

 - *Chapter authors:* R. Couillet, M. Debbah
 - *Publisher:* CRC Press, Taylor & Francis Group
 - *Year:* 2011
- **Orthogonal Frequency Division Multiple Access Fundamentals and Applications** [book chapter]

Chapter “Fundamentals of OFDMA Synchronization” on theoretical considerations and application tools for time offset and frequency offset regulation in OFDM and OFDMA systems.

 - *Chapter authors:* R. Couillet, M. Debbah
 - *Publisher:* Auerbach Publications, CRC Press, Taylor & Francis Group
 - *Year:* 2010

TUTORIALS

- R. Couillet, H. Tiomoko Ali “Random Matrices for Big Data Signal Processing and Machine Learning”, IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP’17), New Orleans, USA, 2017.
- R. Couillet, “Random Matrices, Robust Estimation, and Applications”, IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP’15), Brisbane, Australia, 2015.
- R. Couillet, A. Kammoun, “Future Random Matrix Tools for Large Dimensional Signal Processing”, European Conference on Signal Processing (EUSIPCO), Lisbon, Portugal, 2014.
- R. Couillet, M. Debbah, “Random Matrix Advances in Signal Processing”, IEEE International Workshop on Signal Processing Advances in Wireless Communications, Darmstadt, Germany, 2013.
- R. Couillet, M. Debbah, “Random Matrix Theory for Signal Processing Applications”, IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP’11), Prague, Czech Republic, 2011.
- R. Couillet, M. Debbah, “Random Matrices in Wireless Flexible Networks”, International ICST Conference on Cognitive Radio Oriented Wireless Networks and Communications (Crowncom’10), Cannes, France, 2010.
- R. Couillet, M. Debbah, “Eigen-Inference Statistical methods for Cognitive Radio”, European Wireless, Lucca, Italy, 2010.

VISITING APPOINTMENTS

Hong-Kong University of Science and Technology, Hong-Kong. **June 2014**

Collaboration work with [Professor M. McKay](#),

- Department of Electronic and Computer Engineering
- Project Topic: robust estimation in large financial data

North Carolina State University, North Carolina, USA. **Nov. 2009**

Collaboration work with [Professor J. W. Silverstein](#),

- Department of Mathematics
- Project Topic: random matrix theory for multi-source energy detection

WORKSHOP ORGANIZATION

Workshops and Special Sessions in international and French symposia

- *International*: Technical Area Chair (IEEE Asilomar, 2016), Special Session “Random Matrices in Signal Processing and Machine Learning” (IEEE SSP, 2016), Special Session “Random Matrix Advances in Signal Processing” (IEEE SSP, 2014), Special Session “Random Matrices and Applications” (IEEE Asilomar, 2013).
- *France*: GdR day “Estimation et traitement statistique en grande dimension” (2013).

PROJECTS

Participation to French and European research projects

- *Europe*: ERC Starting Grant MORE (2012-2017) [co-PI], FP7 NEWCOM# (2012-2015), FET FP7 HIATUS (2012-2015), FP7 NEWCOM++ (2009-2011).
- *France*: ANR RMT4GRAPH (2014-2017) [PI], ANR DIONISOS (2012-2016) [co-PI], ANR SESAME (2008-2012).

PATENTS

Patents owned by ST-Ericsson

- R. Couillet, M. Debbah, **No. 08368028.0** “Process and apparatus for performing initial carrier frequency offset in an OFDM communication system”
- R. Couillet, M. Debbah, **No. 08368023.1** “Method for short-time OFDM transmission and apparatus for performing flexible OFDM modulation”
- R. Couillet, S. Wagner, **No. 09368025.4** “Precoding process for a transmitter of a MU-MIMO communication system”
- R. Couillet, **No. 09368030.4** “Process for estimating the channel in an OFDM communication system, and receiver for doing the same”

PHD STUDENTS PhD students under my supervision.

Lucie Neirac **2017-2020**

- fully advised by myself
- “Deep convolutional networks”
- Defense expected in January 2020
- Grant: INSEE

Zhenyu Liao **2016-2019**

- co-advised (80%) with Y. Chitour
- “Random matrix theory for deep neural networks”
- Defense expected in September 2019
- Grant: Fondation Supélec

Xiaoyi Mai **2016-2019**

- fully advised by myself
- “Random matrix theory for machine learning”
- Defense expected in September 2019
- Grant: DIGICOSME Grant, University ParisSaclay

Hafiz Tiomoko Ali **2015-2018**

- fully advised by myself
- “Community detection in large random graphs”
- Defense expected in September 2018
- Grant: ANR RMT4GRAPH

Gil Katz **2013-2016**

- co-advised (33%) with P. Piantanida and M. Debbah
- “Interactive Communication for Distributed Computing”
- Defense expected in September 2016
- Grant: ERC MORE

Azary Abboud (postdoc à l'INRIA) **2012-2015**

- co-advised (50%) with M. Debbah
- “Distributed optimization for Smart Grids”
- Defense expected in September 2015
- Grant: Fondation Supélec

Julia Vinogradova (postdoc at Linköping University) **2011-2014**

- co-advised (50%) with W. Hachem
- “Large random matrices, statistical inference, and future wireless communication networks”
- Defense in September 2014
- Grant: DIGITEO

Axel Müller (research engineer at HUAWEI) **2011-2014**

- co-advised (50%) with M. Debbah
- “Random matrix applications to multi-cell wireless communication networks”
- Defense in September 2014
- Grant: Intel

INTERNS

Undergraduate students under my supervision.

Liusha Yang (PhD, HKUST) **2015**

Meysam Sadeghi (PhD, NUS) **2015**

Hafiz Tiomoko Ali (master, CentraleSupélec) **2015**

Aymeric Thibault (master, CentraleSupélec) **2015**

Harry Sevi (master, ENS Cachan) **2015**

Adrien Pelletier (master, ENS Cachan) **2012**

MISCELLANEOUS

Languages: French (mother language), English (fluent), German (school level).
